
Tabata Core

A tabata time structure is 20 seconds of work and 10 seconds of rest for 8 rounds, or 4 minutes total. Each is a super set. Alternate exercises during the set.

Mountain Climbers
Plank Jump/Jacks

Full Body V-Ups
Low Ab Kicks - lay on back and flutter kick as close to the ground as you can without your low back arching off the ground

Mason Twists
Side Body Crunch

Swimmers
Opposite arm Opposite Leg Superman

Glute Bridge - If you have one, use a band above the knee and press out against the band the entire time. You can choose to either do the full tabata or do continuous for 2:00. OR you can pick a song and glutei bridge until the song ends. :) Let me know which one you chose and how it went!
